Blood group/ blood types are determined by the presence and absence of certain antigens- substances that can trigger an immune response if they are foreign to the body. Since some antigens can trigger a patient's immune system to attack the transfused blood, safe blood transfusions depend on careful blood typing and cross matching. With this noble motive we decided to organize a blood group detection camp for college students on the occasion of **World Health Day** i.e. **7th April 2022**. The programme was inaugurated by offering garland to portrait of B. Raghunath by the hands of honorable principal, Dr. Vilas Sonawane. Introduction of the program was given by Dr. S.R. Mukkawai. Dr. R.S. Deshmukh, IQAC Co-Ordinator shared his views on the theme of blood group detection and then presidential address was given by Dr. Vilas Sonawane. On this occasion a wall paper focusing the significance of blood group detection was also inaugurated by the hands of all the dignitaries on dais. Students of B. Sc. Second year prepared that wall paper. After vote of thanks to all by Mr. Nitin Pawar, the blood group detection was started. In this camp 45 candidates checked their blood group. Student volunteers of B. Sc. Second year and third year microbiology had taken lot of efforts to make this camp a grand success and to convert the objective of this activity into fruitful outcome.
